Rave™ Re-New

EXPERIENCE THE FUTURE OF

Tanning

Meet Hybrid Tanning — a modern blend of UV tanning and red light technology in one lamp. This unique combination creates a glow that's more balanced, radiant, and luxurious.

Benefits of Hybrid Lamps

- Deeper, More Even Color – Achieve a golden glow that looks smooth and natural.
- Balanced Tanning Experience – Red light works with UV for consistent, beautiful results.
- Refresh & Rejuvenate – Red light sessions are often described as leaving skin feeling revitalized and refreshed.
- Luxury You Can Feel – Enjoy a more comfortable, spa-like tanning experience.
- Simple Upgrade – Same time, same process — just a better glow.

Why Red Light?

Red light technology is widely recognized for its potential to:

- Enhance the tanning session experience
- Help skin feel smoother and more refreshed
- Promote an energized, revitalized look
- Add a modern, wellness-inspired edge to tanning
